Helpful Information

Mandated Leadership (Basic Supervision)

ARS §41-763 mandates that all supervisors and managers complete Personnel Management Leadership (Basic Supervision) training. These courses include: Elements of Supervision, Coaching Employees, Team Leadership and Development, Managing Employee Performance, Positive and Negative Employee Behavior and Ethical Issues in the Public Sector. Courses may have prerequisites, which must be taken prior to enrollment.

Courses Required:

MAP1001 Elements of Supervision
HRD1075 Coaching Employees
HRD1070 Team Leadership and Development
HRD1010 Managing Employee Performance
HRD1005 Positive and Negative Employee Behavior
PHI1001 Ethical Issues in the Public Sector (if not previously taken)

CPM Courses

The Certified Public Manager Program (CPM) is a nationally recognized management development program for public managers and supervisors. Over 20 states (including Arizona) and the federal government participate in the National CPM Consortium. The Consortium establishes accreditation requirements. This professional certification is designed to create thoughtful practitioners who apply useful managerial techniques to address public-sector challenges. The emphasis is on practical application.

Arizona Government University (AzGU) is now offering classes approved as feeder classes that will allow participants to transfer to Arizona State University (downtown campus) and complete the Certified Public Manager (CPM) Program.

Course Requests

You may request additional sessions of any course to accommodate your specific date or group needs. Every consideration will be made to accommodate the request. Please email your requests to: stars@azgu.gov.

CSA2051 1.0 POWERPOINT 97 MODULE II

Contact Hours: 5.00

The PowerPoint 97 program was designed for people who want to produce their own presentations quickly and under their own control. The slides that are created will have a professional appearance. There are specialized drawing tools and a built-in word processor that includes a spelling checker.

Module I introduced you to the most basic features of the software. These were features that required minimum explanation and provided the easiest and fastest method of creating a presentation.

In this Trainee Handout you will be creating a presentation designed for use with an overhead projector. The presentation will include importing clip art, importing text from Microsoft Word 97, and creating a chart using the chart generator. After the presentation is completed, it will be printed using a laser printer. The printout can be used to create overhead transparencies using properly equipped photo copiers and thermal transparency copiers.

You will also create an electronic presentation. This presentation will use the overhead transparency presentation as a template. This presentation will be different from the presentation created in Module I. It will not include a background design. It will address advanced customizing features not discussed in Module I.
